

ACME – company view

2020/21

Commitments (progress verified)

Company	Commitment and context	Progress	Framing
ACME	ACME is targeting net zero Scope 1 and Scope 2 emissions on a disclosed 2017-18 baseline by 2030 (market-based). "ACME will reduce emissions across its businesses and has invested in supply chain efficiency improvements, anticipating a step change reduction in emissions by 2025." See ACME's corporate report ¹ for more information.	<p>501,189 t CO₂-e</p> <p>33%</p> <p>towards goal of net zero emissions by 2030 (2017-18 baseline)</p>	<p>S1+2</p> 
XYZ (ACME subsidiary)	XYZ is committed to 100% consumption of renewable electricity by 2030. "XYZ is accelerating installation of solar generation on buildings where the rooftop is accessible and procuring renewable energy via green procurement options now available in the market."	<p>53%</p> <p>towards goal of 100% renewable energy consumption by 2030</p>	 
QRS (ACME subsidiary)	QRS supply stores are working to reduce net scope 1 emissions by 55% on a disclosed 2017-18 baseline by 2025 (location-based). "QRS has invested in increasing production efficiencies long term. Carbon units will be surrendered for unavoidable emissions."	<p>155,000 t CO₂-e</p> <p>94%</p> <p>towards goal of 55% reduction in Scope 1 emissions by 2025 (2017-18 baseline)</p>	<p>S1</p> 

Other commitments (company assured)

Company	Other commitments and context	2021 update
ACME	"ACME is aiming to reduce the emission intensity of its key saleable product by 25% by 2030 from a 2017-18 baseline."	"As of 2020/21, ACME has reduced emissions intensity 15%."
QRS (ACME subsidiary)	"QRS is working with its supply chain partners to consider and reduce Scope 3 emissions."	"QRS has improved disposal processes of packaging, reducing waste by 25%."

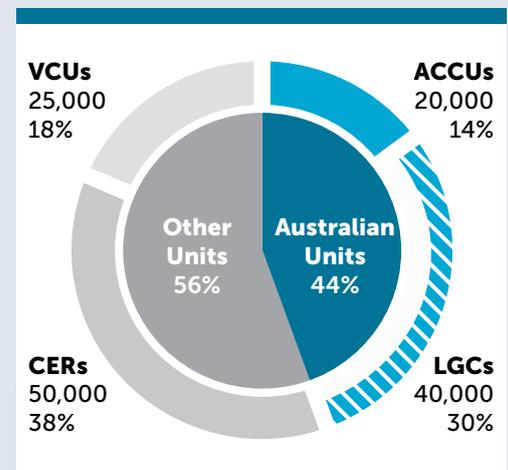

2020/21 net emissions position

Accounting method	Net emissions	Scope 1		Scope 2		Renewable electricity
		Tonnes	Gross	Net	Gross	
	1,025,000			700,000	700,000	
	998,811	420,000	325,000		673,811	23%

Context

XYZ is pursuing a renewable electricity target and are surrendering large-scale generation certificates against their Scope 2 emissions. XYZ emissions represent less than 25% of ACME's total emissions. See datasheet view for additional information.

Units and certificates

Key  Location-based accounting  Market-based accounting  Scope 1 emissions  Scope 1+2 emissions  Scope 3 emissions  Renewable electricity
