

Postcode zones for air source heat pumps and solar water heaters

Version 3: 1 January 2020

The register of solar water heaters includes a list of air source heat pumps (ASHP) and solar water heater (SWH) models. These models are eligible for small-scale technology certificates (STCs) under the Small-scale Renewable Energy Scheme. The number of STCs a particular model is entitled to create will depend on its installation date and geographic location.

The Clean Energy Regulator has determined 5 postcode zones for ASHPs and 4 postcode zones for SWHs in Australia. These assist to calculate how many certificates a system is eligible for. Each zone is based on climate and solar radiation levels and represents the geographical areas of the postcodes.

The 2 tables below list ranges of postcodes and their corresponding zones.

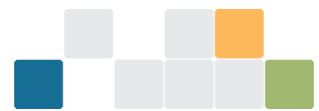

Table 1: Postcode zones for air source heat pumps

Postcode from	Postcode to	Zone	Postcode from	Postcode to	Zone	Postcode from	Postcode to	Zone
800	854	1	2731	2786	3	3363	3370	5
