Safeguard Mechanism surrender walkthrough

Introduction

This guide demonstrates how to surrender Australian carbon credit units (ACCUs) and Safeguard Mechanism credit units (SMCs) to comply with the Safeguard Mechanism. To complete the process you'll need access to the Clean Energy Regulator (CER)'s [Online Services](#)¹ portal, including the [Unit and Certificate Registry](#)².

You may also find these guidance documents useful:

- The [Safeguard Mechanism credit unit issuance and carbon unit surrender guideline](#)³ provides detailed information about the requirements and processes for Safeguard Mechanism surrenders.
- The [Safeguard Online Services user guide](#)⁴ offers general help on using Online Services.
- The [Unit and Certificate Registry guidance](#)⁵ provides general help on using the Unit and Certificate Registry system.

Overview

There are 4 steps to successfully surrendering ACCUs and/or SMCs:

1. Open a Surrender Request form in Online Services.
2. Complete the Surrender Request form in Online Services.
3. Initiate the surrender transaction in the Unit and Certificate Registry.
4. Finalise the surrender in the Unit and Certificate Registry.

You must complete all four of these steps to reduce your facility's net emissions number for the selected monitoring period.

² <https://cer.gov.au/online-systems/new-unit-and-certificate-registry>

³ https://cer.gov.au/document_page/safeguard-mechanism-credit-unit-issuance-and-carbon-unit-surrender-guideline

⁴ https://cer.gov.au/document_page/safeguard-online-services-user-guide

⁵ <https://cer.gov.au/online-systems/new-unit-and-certificate-registry/unit-and-certificate-registry-guidance>

1. Open a Surrender Request form in Online Services

To begin the surrender process, log into Online Services. Make sure you are acting on behalf of the relevant responsible emitter.

On the dashboard, find the ‘Safeguard Carbon Units Surrender Request’ form by searching for ‘surrender’ in the search bar.

Select the form by clicking the arrow icon on its tile.

Note: User permissions

The Safeguard Carbon Units Surrender Request form can only be submitted by a user acting on behalf of the facility’s responsible emitter. If you are acting on behalf of the responsible emitter, ensure that your Online Services user account has the ‘manage facilities’ permission, which allows you to prepare and edit a draft application before submission. These permissions can be managed through the ‘manage user’ function in Online Services.

If a draft application has already been started by another user, you can continue editing it if you have the ‘view submissions list’ and ‘manage submissions’ permissions (located in the ‘form’ permissions list). To continue editing a pre-existing application, locate the application within the dashboard ‘submissions’ table and select ‘edit’. For more information on these permissions and how they are assigned, see the [accessing submissions guide](#)⁶.

Guidance on updating user permissions is available in the [Safeguard Online Services User Guide](#)⁷.

⁶ https://cer.gov.au/document_page/accessing-submissions-online-services-guide

⁷ https://cer.gov.au/document_page/safeguard-online-services-user-guide

2. Complete the Surrender Request form in Online Services

Starting the form

The form is designed to be flexible, allowing you to save progress at any point and return later. You can also generate a PDF copy for review or printing before submission.

If you need assistance, please contact the CER's Safeguard Section via the details provided on the 'Before You Start' page. Once you have reviewed the instructions and confirmed your permissions, click the Next button at the bottom of the page to proceed.

- the name of the responsible emitter and facility
- the financial year the surrender will apply to (for a monitoring period contained within, or ending at the end of a particular financial year, that financial year should be selected).
- the ANREU account number of each account that PCUs will be surrendered from
- the number and type of PCUs that will be surrendered from each ANREU account
- if required, a written explanation from the responsible emitter of the facility for the monitoring period of why more carbon abatement was not undertaken at the facility during the monitoring period.

Who can submit

The facility's responsible emitter must submit this Safeguard carbon unit surrender request form.

An Online Services user linked to the responsible emitter with the 'manage facilities' permission can prepare and edit a draft application form before it is submitted. The 'manage facilities' permission is found in the 'NGER' permissions tab within the 'manage user' function in Online Services. For more information on how to update user permissions please see the [NGER Online Services User Guide](#).

This surrender request form can be saved at any point and continued later, and a copy of the application form can be saved as a PDF and printed at any stage.

If you need any help completing this surrender request form please contact the Safeguard Section on 1300 553 542 or cer-safeguardbaselines@cer.gov.au.

Feedback

Please note that we are currently updating our systems, including the way that participants submit applications and data to us. If you would like to provide feedback on this form and possible improvements you would like to see, we would be grateful to hear from you ([Giving feedback](#)).

Need help?

Contact us on 1300 553 542 or email CER-SafeguardBaselines@cer.gov.au.

 Someone else

The contact person is:
Contact Officer Name

Step 3 of 6

Previous Print Form Save draft **Next**

Provide details about the applicant and the facility associated with the surrender request. The form will display the applicant's information automatically. Confirm that these details are correct before proceeding.

Use the dropdown list to select the safeguard facility that will have its net emissions reduced by this surrender. It is important to ensure that the correct facility is chosen, as this links the surrender to the appropriate emissions obligations.

If you are unable to see your facility, contact us.

If there are no facilities available, check that the 'manage facilities' permission is selected. If it is not, ask an admin user with the 'admin – manage users' permission to add it. This permission is found in the 'NGER' permissions tab within the 'manage user' function in Online Services. Refer to the NGER Online Services user guide for detailed steps.

Identify the contact person for this application. You can choose either 'Me' if you are the person completing the form or 'Someone else' if another individual will act as the contact. When 'Me' is selected, the system will automatically populate your name in the contact details section.

Once all fields have been reviewed and completed accurately, click 'Next' to move to the next stage of the process.

ANREU Account Details

ANREU account and surrender details

ANREU account and surrender details *

ANREU account *

Unit amount *

63,650

Add

Surrender totals

Total carbon units surrender request amount
63,650

Pending surrender amount
0

Maximum recommended surrender amount
63,650

Excess emissions amount from position statement
63,650

This form must be completed by the responsible emitter, but the surrender transaction in the Unit and Certificate Registry (Step 3) can be completed by any ANREU account holder.

To surrender from an ANREU account associated with the responsible emitter, identify the Australian National Registry of Emissions Units (ANREU) account that the carbon units will be surrendered from in the dropdown list. Confirm the account name and identifier match your records before proceeding.

For surrenders from an ANREU account not associated with the responsible emitter please contact us.

Enter the unit amount to be surrendered from the selected account. This figure represents the total number of carbon units you intend to surrender from that ANREU account.

You can use the “Add” button to identify additional ANREU accounts and enter unit amounts to be surrendered from those accounts.

The ‘Surrender totals’ section will automatically calculate and display the:

- total carbon units surrender request amount – the sum of surrender amounts entered
- pending surrender amount – any units identified in surrender applications already in progress for the same facility and financial year
- maximum recommended surrender amount – this is the excess emissions amount from the position statement, minus any pending surrender amounts assuming those transactions will be completed
- excess emissions amount from position statement – the amount shown in the current position statement for the facility for the selected financial year (if available).

30% ACCUs explanation requirement

Is the total amount of ACCUs being surrendered, including any that have already * been surrendered for the monitoring period, equal to or greater than 30% of the facility's baseline emissions number for the monitoring period?

If the total amount of ACCUs being surrendered is equal to or greater than 30% of the facility's baseline emissions number for a monitoring period, the responsible emitter for the facility must provide the CER with a written explanation of why more carbon abatement was not undertaken at the facility during the monitoring period.

The CER must publish the written explanation on its website. For the 2023–24 compliance period, written explanations will be published in April 2025 along with other information relating the 2023–24 compliance period (e.g. facility's covered emissions, net emissions number, baseline emissions number and any carbon units surrendered).

Yes
 No

Step 4 of 6

Previous

Print Form

Save draft

Next

Confirm whether the total amount of ACCUs being surrendered for the facility for the monitoring period (taking into account any previously surrendered units for the same monitoring period) is equal to or greater than 30% of the facility's baseline emissions number for that period.

If the amount of ACCUs meets or exceeds 30% of the baseline, the responsible emitter must provide the CER a written explanation outlining why more carbon abatement was not undertaken at the facility during the monitoring period. Without this explanation the surrender cannot be finalised.

This explanation will be published on the CER website alongside other information, such as the facility's covered emissions, net emissions number, baseline emissions number, and surrendered carbon units. See the [published explanations for the 2023–24 compliance period](#) as an example.

Review these figures carefully to ensure accuracy. Once confirmed, click 'Next' to proceed to the authority section of the form.

Nominating an applicant

Authority

Who will sign the declaration? *

Any user with access to this form for the responsible emitter can sign and submit this form.

Me

Save draft

Submit application

After ticking the declaration box, click 'Submit application' to complete the form.

Receipt of surrender request

Your form has been received

① Form received

Thank you for applying for a Safeguard surrender.

Next steps

We will process your surrender request form within approximately 5 business days of receiving the form. If we require further information in relation to your application, we will contact the nominated contact person by email.

Once we have processed the form, we will create the requested carbon unit surrender transaction(s) in the nominated ANREU account(s). Once the transaction(s) is created, the authorised representatives for the ANREU account(s) will be notified that the surrender transaction(s) is ready to be approved in the ANREU account(s). The contact person for the responsible emitter will also be notified when the surrender form has been processed.

Once this transaction(s) is created in the nominated ANREU account(s) a user of the account(s) must then select the desired prescribed carbon units, and the authorised representatives for the ANREU account(s) must approve the transaction(s).

If you have any questions after completing this form, please call us on 1300 553 542 or email CER-safeguardbaselines@cer.gov.au.

Form submitted.

[Close](#)

The CER will review and process your surrender request within approximately five business days. If additional information is required, the nominated contact person will be contacted via email.

The contact person will be notified when the surrender form has been processed.

If you have any questions after submission, you can contact the safeguard section via the phone number or email provided on the confirmation page.

This concludes the online form submission process.

3. Initiate surrender transaction in the Unit and Certificate Registry

After receiving and processing the Safeguard Carbon Units Surrender Request form, the CER will create the surrender transaction in the nominated ANREU account. At this point, the authorised representatives for the ANREU account will be notified that the transaction is ready in the Unit and Certificate Registry.

To finalise the surrender, you and/or other users authorised to act on behalf of the responsible emitter must use the Unit and Certificate Registry to:

- initiate the surrender transaction, and
- approve the surrender transaction.

Your surrender will not be finalised, and the facility's net emissions number will not be reduced, until these steps are completed in the Unit and Certificate Registry.

General information is available in our [Unit and Certificate Registry guidance](#)⁸.

⁸ <https://cer.gov.au/online-systems/new-unit-and-certificate-registry/unit-and-certificate-registry-guidance>

Navigate to Safeguard surrender in the Unit and Certificate Registry

After logging into the Unit and Certificate Registry and selecting the correct trading account, go to the left-hand navigation menu and click 'Safeguard surrender'. Your new surrender should display with 'Pending' status.

	ACME Carbon		Carbon Capture and...								

The ‘Safeguard surrender units’ page allows you to choose which ACCUs and/or SMCs to surrender for the selected facility and monitoring period.

Review the table and identify the number of units you want to surrender from each unit block by entering the quantity to surrender in the relevant row.

Use the buttons at the top of the table to toggle between viewing ACCUs and SMCs. You can select both ACCUs and SMCs within the same surrender transaction.

In the ‘Quantity selected’ column, type the amount you wish to surrender from each unit block. For example, if the required amount is 4,444 units, you might select 2,000 units from one unit block and the remainder from another. As you enter quantities, the summary at the bottom updates to show the total selected against the quantity specified by the responsible emitter in the Surrender Request form for the surrender transaction (displayed as ‘Quantity required’). Continue adjusting until the total equals the ‘Quantity required’.

Comments

Visible to both the transferring and acquiring accounts

Step 2 of 2

Back **Initiate surrender**

Transaction awaiting approval

Once you have initiated the surrender transaction, all authorised representatives for the ANREU account are notified.

The transaction status will display as 'Awaiting approval' in your Online Services account.

At this stage, the surrender is not yet complete. An authorised representative with approver permissions must log in to the Unit and Certificate Registry, review the transaction details, and finalise the approval.

4. Finalise the surrender in the Unit and Certificate Registry

Navigate to Safeguard surrender

Log into the Unit and Certificate Registry to approve the transaction. From the left-hand menu, select 'Safeguard surrender' and select the transaction. The transaction status should be listed as 'Awaiting approval'.

Review transaction details and approve

Select the 'Review surrender' button in the top right.

The screenshot shows the 'AU-3478: ACME Group Trading Account' page. The left sidebar has a 'Safeguard surrender' button highlighted in blue. The main content shows 'Surrender details' with a status of 'Awaiting approval'. The 'Review surrender' button is highlighted in red. The 'Summary' table includes the following data:

Reference number	Facility
ACS-25-OPT069910599	ACME Logistics (facility)
Responsible emitter	Monitoring period
	2023-24
Created date	Due date
06 May 2025	06 May 2025
Completed date	Quantity required
	201

The 'Surrender details' page confirms that the surrender is awaiting approval and provides the details of the surrender.

You can add comments to other users at the bottom of the page before approving the surrender.

If the details are correct, select the 'Approve surrender' button on the bottom right.

Selecting the 'Approve surrender' button will finalise your surrender. This will cause the net emissions number for the selected facility to be reduced for the selected monitoring period by the number of surrendered units (except if a 30% ACCU surrender explanation is required and still outstanding, in which case the net emissions number will not be reduced until that explanation is provided).

Surrender transaction completed

The screenshot shows the 'Transaction details' page for a completed surrender transaction. The transaction ID is 206413000, and the type is 'Safeguard surrender'. The transferring account is 'AU-3478: ACME Group Trading Account' (ACME Group Pty Ltd) and the acquiring account is 'AU-2804: Australian carbon credit unit cancellation account (Safeguard surrender)' (Commonwealth of Australia). The quantity required is 201. The selected ACCUs table shows one row: Project ID ERF22244, Project name Project XYZ, Method type Waste, Method Avoided emissions from..., Vintage 2024-25, Location NSW, VIC, and Quantity 201.

Project ID	Project name	Method type	Method	Vintage	Location	Quantity
ERF22244	Project XYZ	Waste	Avoided emissions from...	2024-25	NSW, VIC	201

Once a surrender transaction is complete:

- A record of the completed transaction will be available in the ANREU account.
- The responsible emitter for the facility will be able to view the draft and completed surrender transactions on the facility's carbon units page in Online Services.
- A new position statement will be available in the responsible emitter's Online Services account within 5 business days.
- An email will be sent to the contact person for the responsible emitter when the new position statement is available.
