Q4

Do you think the Draft Instrument strikes the right balance between supporting participation and abatement, ensuring integrity of abatement, and facilitating a risk based approach to compliance?	No
--	-----------

Q5

Please specify why you answered 'yes', 'no' or 'unsure' and include relevant evidence.

Any scheme based on a fixed expense (cost of initial survey) and variable income (market sets the price) ALWAYS LEADS TO FARMERS GOING BANKRUPT!
Because they borrow money for the survey and carry the debt for 5 years with interest then the price drops to well below what was originally promised and the farmers left holding the debt.

Q10

Do you have any further feedback to provide on the Draft Instrument or alternative assurance arrangements for low-risk environmental plantings 2024 projects?

Yes, you pay all expenses take all the risks using funds from people living in cities on behalf of the Nation and then share the benefits with the landowners and the nation when carbon is captured.
