Voluntary CEA Data Release	
Project Name	Poon Boon Regeneration Project
Project ID	ERF101228
Project Proponent	Rodney Charles Boal and Kaylene Dulcie Boal
Method	Carbon Credits (Carbon Farming Initiative) (Human-Induced Regeneration of a Permanent Even-Aged Native Forest - 1.1) Methodology Determination 2013 c3
Method URL	https://www.legislation.gov.au/Details/F2018C00125
Project Area	11,794 ha as of 5 September 2022
CEA area	8,131 ha as of 5 September 2022
CEA Map	Date Project Registered	3 August 2015
Start Project Crediting Period	1 January 2011
Model Commencement Date (if applicable)	1 February 2008
Carbon abatement model (if applicable)	FullCAM 2020

The information contained in this document has been provided by the project proponent(s) of the project and has not been independently checked or verified against the Clean Energy Regulator's data holdings. The information contained in the PDF has also not been checked for accuracy or sufficiency by the Clean Energy Regulator. Proponents are responsible for the data and other contents of the PDF not the Clean Energy Regulator.

Voluntary CEA Data Release	
Key Modelling Parameters (if applicable)	
Data sources	- CEA is defined through a project specific supervised classification process using the Random Forest algorithm and machine learning processes with both open-source and commercial GIS software (QGIS, ArcGIS, Manifold). - NCAS, Sentinel-2 mosaic/s, disturbances identified through sources such as SLATS, NAFI and manual exclusions, management history, stocking data, state cadastre, land titles - On-site waypoint collection
Baseline scenario	- Feral animals
Management changes associated with the carbon project	- Management, in a humane manner, of feral animals

The information contained in this document has been provided by the project proponent(s) of the project and has not been independently checked or verified against the Clean Energy Regulator's data holdings. The information contained in the PDF has also not been checked for accuracy or sufficiency by the Clean Energy Regulator.
