

Voluntary CEA Data Release	
Project Name	Jandra/Nulty Regeneration Project
Project ID	ERF101511
Project Proponent	Phillip Hugh Ridge
Method	Carbon Credits (Carbon Farming Initiative) (Human-Induced Regeneration of a Permanent Even-Aged Native Forest - 1.1) Methodology Determination 2013 c1
Method URL	https://www.legislation.gov.au/Details/F2015C00576
Project Area	74,107 ha as of 16 February 2023
CEA area	24,775 ha as of 16 February 2023
CEA Map	<p>The map displays the project area with three distinct regions: a grey area representing 'Exclusion', a green area representing 'Baseline forest', and a blue area representing 'CEA'. The CEA area is the largest and most irregularly shaped region, covering a significant portion of the project's total area. The Baseline forest is located in the upper left and lower right sections. The Exclusion area is primarily in the center and lower left. A scale bar at the bottom right indicates a distance of 10 km.</p>
Date Project Registered	18 August 2015
Start Project Crediting Period	23 March 2012
Model Commencement Date (if applicable)	31 March 2009
Carbon abatement model (if applicable)	RMT

The information contained in this document has been provided by the project proponent(s) of the project and has not been independently checked or verified against the Clean Energy Regulator's data holdings. The information contained in the PDF has also not been checked for accuracy or sufficiency by the Clean Energy Regulator. Proponents are responsible for the data and other contents of the PDF not the Clean Energy Regulator.

Voluntary CEA Data Release	
Key Modelling Parameters (if applicable)	Weed control at MCD: on & off (varies depending on management history of CEA)
Data sources	<ul style="list-style-type: none"> - CEA is defined through a project specific supervised classification process using the Random Forest algorithm and machine learning processes with both open-source and commercial GIS software (QGIS, ArcGIS, Manifold). - NCAS, Sentinel-2 mosaic/s, disturbances identified through sources such as SLATS, NAFI and manual exclusions, management history, stocking data, state cadastre, land titles - On-site waypoint collection
Baseline scenario	<ul style="list-style-type: none"> - Livestock - Feral animals
Management changes associated with the carbon project	<ul style="list-style-type: none"> - Management of the timing, and the extent, of grazing - Management, in a humane manner, of feral animals
