Voluntary CEA Data Release	
Project Name	Yarrawonga Willara Forest Regeneration Project
Project ID	ERF101535
Project Proponent	Stuart Timothy Keane and Jocelyn Margaret Keane as the Trustees for Willara Partners Family Trust
Method	Carbon Credits (Carbon Farming Initiative) (Human-Induced Regeneration of a Permanent Even-Aged Native Forest - 1.1) Methodology Determination 2013 c1
Method URL	https://www.legislation.gov.au/Details/F2015C00576
Project Area	27,489 ha as of 1 December 2022
CEA area	16,704 ha as of 1 December 2022
CEA Map	Date Project Registered	30 September 2015
Start Project Crediting Period	1 January 2011
Model Commencement Date (if applicable)	1 February 2010
Carbon abatement model (if applicable)	RMT

The information contained in this document has been provided by the project proponent(s) of the project and has not been independently checked or verified against the Clean Energy Regulator's data holdings. The information contained in the PDF has also not been checked for accuracy or sufficiency by the Clean Energy Regulator. Proponents are responsible for the data and other contents of the PDF not the Clean Energy Regulator.

Date Received: 19/05/2023

Voluntary CEA Data Release	
Key Modelling Parameters (if applicable)	Weed control at MCD: off
Data sources	- CEA is defined through a project specific supervised classification process using the Random Forest algorithm and machine learning processes with both open-source and commercial GIS software (QGIS, ArcGIS, Manifold). - NCAS, Sentinel-2 mosaic/s, disturbances identified through sources such as SLATS, NAFI and manual exclusions, management history, stocking data, state cadastre, land titles - On-site waypoint collection
Baseline scenario	- Feral animals - Mechanical or chemical destruction, or suppression, of regrowth
Management changes associated with the carbon project	- Management, in a humane manner, of feral animals - Implementation of a decision to permanently cease the mechanical or chemical destruction, or suppression, of regrowth

The information contained in this document has been provided by the project proponent(s) of the project and has not been independently checked or verified against the Clean Energy Regulator's data holdings. The information contained in the PDF has also not been checked for accuracy or sufficiency by the Clean Energy Regulator.
