Voluntary CEA Data Release	
Project Name	Kilcowera and Zenonie Forest Regeneration Project
Project ID	ERF101776
Project Proponent	Vision Pastoral Company Pty Limited
Method	Carbon Credits (Carbon Farming Initiative) (Human-Induced Regeneration of a Permanent Even-Aged Native Forest - 1.1) Methodology Determination 2013 c1
Method URL	https://www.legislation.gov.au/Details/F2015C00576
Project Area	79,182 ha as of 17 February 2023
CEA area	43,561 ha as of 17 February 2023
CEA Map	Exclusion Baseline forest CEA
Date Project Registered	21 August 2015
Start Project Crediting Period	30 June 2012 + later start of crediting for some CEAs (31/1/2016 - 8,722.9 ha)
Model Commencement Date (if applicable)	1 January 2010 + later model commencement date for some CEAs (31/1/2016 - 8,722.9 ha)
Carbon abatement model (if applicable)	RMT

Voluntary CEA Data Release	
Key Modelling Parameters (if applicable)	Weed control at MCD: on Hectares modelled as fire disturbance: 179
Data sources	- CEA is defined through a project specific supervised classification process using the Random Forest algorithm and machine learning processes with both open-source and commercial GIS software (QGIS, ArcGIS, Manifold). - NCAS, Sentinel-2 mosaic/s, disturbances identified through sources such as SLATS, NAFI and manual exclusions, management history, stocking data, state cadastre, land titles - On-site waypoint collection
Baseline scenario	- Livestock - Feral animals - Mechanical or chemical destruction, or suppression, of regrowth
Management changes associated with the carbon project	- Management of the timing, and the extent, of grazing - Management, in a humane manner, of feral animals - Implementation of a decision to permanently cease the mechanical or chemical destruction, or suppression, of regrowth
