

Voluntary CEA Data Release	
Project Name	Wambin Carbon Project
Project ID	ERF101830
Project Proponent	Bignell Pty. Ltd. as the Trustee for the B B Bignell Family Trust
Method	Carbon Credits (Carbon Farming Initiative) (Human-Induced Regeneration of a Permanent Even-Aged Native Forest - 1.1) Methodology Determination 2013 c1
Method URL	https://www.legislation.gov.au/Details/F2015C00576
Project Area	65,474 ha as of 10 January 2023
CEA area	7,155 ha as of 10 January 2023
CEA Map	 <p>The map displays the project area with three distinct regions: a large grey area representing 'Exclusion', a green area representing 'Baseline forest', and a blue area representing the 'CEA' (Carbon Emissions Abatement). The CEA area is located in the western and northern parts of the project. A scale bar at the bottom right indicates a distance of 8 km.</p>
Date Project Registered	18 September 2015
Start Project Crediting Period	1 January 2012
Model Commencement Date (if applicable)	1 March 2010
Carbon abatement model (if applicable)	RMT

Voluntary CEA Data Release	
Key Modelling Parameters (if applicable)	Weed control at MCD: off Hectares modelled as fire disturbance: 248
Data sources	<ul style="list-style-type: none"> - CEA is defined through a project specific supervised classification process using the Random Forest algorithm and machine learning processes with both open-source and commercial GIS software (QGIS, ArcGIS, Manifold). - NCAS, Sentinel-2 mosaic/s, disturbances identified through sources such as SLATS, NAFI and manual exclusions, management history, stocking data, state cadastre, land titles - On-site waypoint collection
Baseline scenario	<ul style="list-style-type: none"> - Livestock - Feral animals
Management changes associated with the carbon project	<ul style="list-style-type: none"> - Management of the timing, and the extent, of grazing - Management, in a humane manner, of feral animals
