

Voluntary CEA Data Release	
Project Name	Wiggera Regeneration Project
Project ID	ERF158238
Project Proponent	Fay Mary Cooney, Grant Patrick Cooney
Method	Carbon Credits (Carbon Farming Initiative) (Human-Induced Regeneration of a Permanent Even-Aged Native Forest - 1.1) Methodology Determination 2013 c3
Method URL	https://www.legislation.gov.au/Details/F2018C00125
Project Area	14,028 ha as of 3 June 2022
CEA area	5,552 ha as of 3 June 2022
CEA Map	 <p>A map of the Wiggera Regeneration Project area. The map is tilted and shows a complex pattern of land use. A legend on the right side identifies three categories: Exclusion (grey), Baseline forest (green), and CEA (blue). A scale bar at the bottom right indicates 4 km.</p>
Date Project Registered	31 August 2020
Start Project Crediting Period	31 August 2020
Model Commencement Date (if applicable)	1 March 2016
Carbon abatement model (if applicable)	FullCAM 2016

Voluntary CEA Data Release	
Key Modelling Parameters (if applicable)	Growth pauses before project start: 1
Data sources	<ul style="list-style-type: none"> - CEA is defined through a project specific supervised classification process using the Random Forest algorithm and machine learning processes with both open-source and commercial GIS software (QGIS, ArcGIS, Manifold). - NCAS, Sentinel-2 mosaic/s, disturbances identified through sources such as SLATS, NAFI and manual exclusions, management history, stocking data, state cadastre, land titles - UAV photogrammetry (3D point cloud & orthomosaic image), on-site photographs
Baseline scenario	<ul style="list-style-type: none"> - Livestock - Feral animals
Management changes associated with the carbon project	<ul style="list-style-type: none"> - Management of the timing, and the extent, of grazing - Management, in a humane manner, of feral animals - Implementation of a decision to permanently cease the mechanical or chemical destruction, or suppression, of regrowth
